Nazarbayev University
2025-2026

B.A. Economics
Nazarbayev University GSB
2026 – Present

Skills

- Project Management
- Product Development
- Data Analysis
- Research
- Strategic Planning
- Web Development
- AI Tools
- Public Communication

Experience & Leadership

2026 - Present

SapaSpeakers L.V.O.

CTO / Technical Lead

Lead the technical direction of SapaSpeakers, a volunteer organization involved in large-scale events and university initiatives. Responsible for identifying operational challenges that can be addressed through technology, planning and developing internal digital solutions, and supporting the organization's broader projects with technical expertise. Work closely with the leadership team on process improvement, volunteer-management infrastructure, and organizational development while contributing to SapaSpeakers' expansion and collaboration with external institutions.

2024 – Present

Independent Product Developer

Design and develop digital products addressing practical problems in student life, organizational management, business operations, and event services. Manage the full product-development cycle, including problem identification, product strategy, requirements definition, interface and workflow design, database architecture, implementation, testing, and deployment. Have developed full-stack platforms involving authentication, administrative dashboards, data-management systems, operational workflows, analytics, and automation using technologies including Next.js, TypeScript, Supabase, PostgreSQL, Vercel, and AI-assisted development tools. These projects have strengthened my ability to translate complex operational requirements into structured, usable, and scalable digital systems.

2026 – Present

NU / Astana Hub / SapaSpeakers L.V.O.

Volunteer & Event Operations

Contributed to the organization and delivery of major educational, entrepreneurial, corporate, and public events, including Nazarbayev University Open House Day, Pizza Pitch at Astana Hub, and the Samruk-Kazyna Spartakiad. Responsibilities included supporting event operations, assisting participants and organizers, coordinating on-site activities, and working within large volunteer teams in time-sensitive environments. Selected as one of three Team Leads for Digital Bridge 2026, where I will be responsible for coordinating approximately 50–70 volunteers within SapaSpeakers' overall team of around 150–200 volunteers, including task distribution, communication, operational coordination, and ensuring effective execution throughout the three-day event.
